Esrey Energy Ltd.

Notes to the unaudited condensed consolidated interim financial statements
(Expressed in Canadian dollars, except number of shares and per share amounts)

1. Nature of operations

Esrey Energy Ltd. (the "Company" or "Esrey") was incorporated on February 24, 2000 in the Province of British Columbia and changed its name from LNG Energy Ltd. to Esrey Energy Ltd. on November 13, 2013. The Company's common shares trade under the symbol "EEL" on the TSX Venture Exchange. The Company is engaged in exploration activities on its oil and gas properties in Papua New Guinea and Bulgaria. The address of Esrey's registered office is Suite 250, 1075 West Georgia Street, Vancouver, British Columbia, V6E 3C9.

2. Basis of presentation and going concern

(a) *Statement of compliance*

These unaudited condensed interim financial statements of the Company for the three and nine months ended June 30, 2016, have been prepared in accordance with IFRS, as issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee. They have been prepared in accordance with IAS 34 Interim Financial Reporting and should be read in conjunction with the Company's September 30, 2015 audited annual financial statements.

The significant accounting policies applied in these financial statements are based on IFRS issued and outstanding policies as of August 18, 2016, the date the Board of Directors approved the financial statements.

(b) *Basis of measurement*

These unaudited condensed consolidated interim financial statements have been prepared on an historical cost basis, and are presented in Canadian dollars, unless otherwise indicated.

The preparation of financial statements in accordance with IFRS requires management to make certain critical accounting estimates and exercise judgment in applying the Company's accounting policies. As a precise determination of many assets and liabilities is dependent upon future events, the preparation of consolidated financial statements for a period involves the use of estimates, which have been made using careful judgment. Actual results may differ from these estimates. The areas involving a higher degree of judgment, complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4 of the Company's audited consolidated financial statements for the year ended September 30, 2015.

(c) *Going concern*

These unaudited condensed consolidated interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The Company continues to be in the exploration stage and therefore has generated no revenues to date from its existing properties. The Company will be required to incur significant amounts of capital on its exploration and evaluation projects in order to meet the work commitments dictated by the terms of the concessions, determine whether commercially economical reserves exist and, if commercially economical reserves exist, to further develop the properties. As a result, the Company will be required to raise capital or seek other alternatives such as farm-out arrangements or the sale of properties in order to generate this capital.

Esrey Energy Ltd.

Notes to the unaudited condensed consolidated interim financial statements
(Expressed in Canadian dollars, except number of shares and per share amounts)

2. Basis of presentation and going concern (continued)

(c) *Going concern (continued)*

There can be no assurance that funding will be available to the Company when needed or, if available, that this funding will be on acceptable terms. If adequate funds are not available, the Company may not be able to further develop its exploration and evaluation projects.

Even if adequate funds are available, there is no guarantee that the Company will meet the work commitments dictated by the terms of the concessions (Note 4). If the Company does not meet the work commitments dictated by the terms of a concession and is not able to obtain an amendment or extension, the Company risks losing the concession. Whether the Company meets the work commitments of a concession or not, there is no guarantee that the Company will discover commercially economical reserves or, if commercially economical reserves are found, there is no guarantee that the Company will be able to further develop its properties. The Company presently does not have sufficient funds to develop all of its existing properties and to continue with ongoing operations. As a result, material uncertainties exist with respect to the recovery of costs previously spent on capital projects and the ability to find, develop and produce oil and natural gas reserves. In turn, significant doubt may exist with respect to the Company's ability to continue as a going concern.

Management believes the use of the going concern assumption is appropriate based upon the assumption that the Company will have sufficient cash resources to meet its ongoing obligations as they become due in the normal course of operations. The Company has successfully raised financing in the past and believes that it may be able to raise the necessary financing in the future.

These unaudited condensed consolidated interim financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Therefore, the Company may be required to realize its assets and discharge its liabilities in other than the normal course of business at amounts different from those reflected in the unaudited condensed consolidated interim financial statements.

3. Significant accounting policies

The preparation of these unaudited condensed consolidated interim financial statements is based on accounting principles and practices consistent with those used in the preparation of the audited consolidated financial statements as at September 30, 2015, amended, were applicable, by the adoption of the new amended accounting standards outlined below. The accompanying unaudited condensed consolidated interim financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended September 30, 2015.

(a) *Application of new and revised IFRS*

Effective October 1, 2015, there were no new or revised IFRS that were issued by the IASB that were adopted by the Company.

Esrey Energy Ltd.

Notes to the unaudited condensed consolidated interim financial statements

3. Significant accounting policies (continued)

(b) Future accounting pronouncements

Certain pronouncements have been issued by the IASB that are mandatory for accounting years beginning after October 1, 2015 or later years.

Accounting standards issued but not yet effective:

- (i) Amended standard IFRS 10, *Consolidated Financial Statements*
The amendments to IFRS 10 deal with the sale or contribution of assets between an investor and its associate or joint venture. Effective for annual periods commencing on or after January 1, 2017.
- (ii) Amended standard IAS 28, *Investments in Associate and Joint Venture*
The amendments to IAS 28 deal with the sale or contribution of assets between an investor and its associate or joint venture. Effective for annual periods commencing on or after January 1, 2017.
- (iii) Amended standard IAS 7, *Statement of Cash Flows*
These amendments to IAS 7 “Statement of Cash Flows” were issued to improve information provided to users of financial statements about an entity’s changes in liabilities arising from financing activities. Effective for annual periods commencing on or after January 1, 2017.
- (iv) Amended standard IAS 12, *Income Taxes*
These amendments relate to the recognition of deferred tax assets for unrealized losses associated with debt instruments measured at fair value. Effective for annual periods commencing on or after January 1, 2017.
- (v) Amended standard IFRS 7, *Financial Instruments: Disclosures*
The amendments to IFRS 7 outline the disclosures required when initially applying IFRS 9 Financial Instruments. Effective date January 1, 2018.
- (vi) New standard IFRS 9, *Financial Instruments*
Replacement of IAS 39 *Financial Instruments: Recognition and Measurement*. Effective date January 1, 2018.
- (vii) New standard IFRS 15, *Revenue from Contracts with Customers*
IFRS 15 provides guidance on how and when revenue from contracts with customers is to be recognized, along with new disclosure requirements in order to provide financial statement users with more informative and relevant information. Effective date January 1, 2018.
- (viii) New standard IFRS 16, *Leases*
Effective for annual periods commencing on or after January 1, 2019, this replaces existing lease accounting guidance. All leases will be required to be reported on the statement of financial position unless certain requirements for exclusion are met.

The Company has not early adopted these new and amended standards and is currently assessing the impact that these standards will have on the consolidated financial statements.

(i) Business transactions

On April 22, 2013, the Company closed a farm-in agreement with Heritage in which Heritage obtained an 80% participating interest in both PPL 486 and PRL 13, subject to the fulfillment of certain work commitments, in exchange for payment of \$7,522,079. The work commitments consisted of the following:

- Acquisition of a minimum of 78km of seismic within the license areas; and,
- Drilling and completion of one exploration well in PPL 486 to a depth sufficient to test identified exploration targets.

In May 2014, Heritage informed the Company it had acquired a total of 235km of seismic, of which 215km was on PPL 486 and 20km was on PRL 13. This satisfied the requirements of the second tranche of the farm-in agreement and ensured Heritage retained a minimum 40% interest in PPL 486 and PRL 13. In order for Heritage to retain its additional 40% interest, Heritage was required to drill and complete one exploration well in PPL 486 to a depth sufficient to test identified exploration targets.

On May 30, 2014, the Company's subsidiaries, Telemu, LNG Energy LNG PNG and LNG Energy No. 2 Limited ("LNG No. 2"), entered into an amendment to the farm-in agreement with Heritage. In exchange for the extension of the deadline to spud the first exploration well from October 1, 2014, to December 31, 2015, the farm-in agreement was amended as follows:

- Telemu received a further cash payment of US\$2,500,000 (Cdn\$2,710,250);
- Heritage would carry Telemu for 30% of Telemu's 20% interest in a second exploration well, in the event that a second well is drilled; and,
- Heritage would fund 100% of any joint operating costs incurred after the fulfillment of its obligations under the farm-in agreement in respect of the first exploration well until the earlier of the spud of the second exploration well or the 180th day following the date of testing and suspension or abandonment of the first exploration well.

On September 22, 2015, the Company was notified by Heritage that it would not be funding the drilling of the first exploration well on PPL 486 and therefore would not fulfill its final commitment under the farm-in agreement. Under the farm-in agreement, Heritage had the option to withdraw from PPL486 and PRL 13 licenses (the "Licenses") or to retain a 40% participating interest in the Licenses. Heritage advised the Company that it wishes to retain a 40% participating interest and as a result would re-transfer the other 40% participating interest in the Licenses back to Telemu and LNG PNG respectively. In accordance with the farm-in agreement, Telemu and LNG PNG assumed operatorship of the Licenses.

On September 29, 2015, Telemu and LNG PNG filed the necessary documents with the DPE to assume operatorship of PPL 486 and PRL 13 with immediate effect. On November 11, 2015, the necessary documents were filed with the DPE for the re-transfer of a 40% interest in PPL 486 and PRL 13 back to Telemu and LNG PNG, respectively. These re-transfers require Minister acknowledgement. As of the date of these financial statements, this acknowledgement has not been received.

4. Exploration and evaluation assets (continued)

(a) Papua New Guinea (continued)

(ii) Licenses

As at June 30, 2016, the Company holds a 50.55% working interest in Petroleum Prospecting License (“PPL”) 486 (formerly PPL 319), an 84.25% working interest in PPL 321, and a 60% working interest in Petroleum Retention License (“PRL”) 13 through permits received from the Minister of Petroleum and Energy for Papua New Guinea (“Minister”). In November 2014, PPLs 320 and 322 expired and were allowed to lapse.

PPL 486

PPL 486 was obtained in June 2014, and is the result of the top-filing of PPL 319. PPL 486 encompasses the same territory as PPL 319 did and has a six year term along with conditional work and expenditure commitments, to be no less than US\$30 million during the initial two years. The entire work program includes:

- Years 1 and 2: acquisition of a minimum of 50km of seismic and the drilling of the first exploration well;
- Years 3 and 4: analysis of the data acquired in years 1 and 2, acquisition of an additional minimum of 50km of seismic, and the drilling of a second exploration well; and
- Years 5 and 6: analysis of data from the previous four years and the drilling of a third exploration well.

On September 11, 2015, the Company was informed that the Minister had approved a variance to move the requirement for 50km of seismic from Years 1 and 2 into Years 3 and 4, thereby bringing the total seismic requirement for Years 3 and 4 to 100km. On June 10, 2016 a variance was filed with the DPE requesting a change in the work program for PPL 486. This variance would move the well requirement for Years 1 and 2 into Years 3 and 4 with an option for additional seismic in place of the well. As of August 18, 2016, approval for the variance has not been received.

Up until September 22, 2015, the Company had a 16.85% interest in PPL 486. Due to Heritage not fulfilling its final commitment under the farm-in agreement, Heritage advised the Company that it would re-transfer the other 40% participating interest in the licenses back to the Company’s subsidiary Telemu No. 18 Limited (“Telemu”). Therefore as at June 30, 2016, the Company has a 50.55% working interest in PPL 486.

PPL 321

The Company submitted an application to simultaneously surrender and top-file PPL 321 in August 2014, seeking a new 6 year license. PPL 321 expired in November 2014 and, as at August 18, 2016, the Company had not received a formal response from the Department of Petroleum and Energy (“DPE”) with regards to the top-filing application for PPL 321. On September 30, 2015, the Company had fully impaired the carrying amount of \$883,760 (1.9 million kina) with respect to PPL 321, given that the granting of the license renewal remains outstanding.

(b) Papua New Guinea (continued)

(ii) Licenses (continued)

PRL 13

Effective June 2014, the Company was granted a three year extension for PRL 13. This extension carried with it a commitment to acquire 10km of seismic in each of the first two years of the extension carrying a value of US\$2.8 million. Prior to the granting of the extension, the Company acquired approximately 20km of seismic on PRL 13. The seismic portion of this work commitment has been fulfilled.

Due to Heritage not fulfilling its final commitment under the farm-in agreement, on September 22, 2015, Heritage advised the Company that it would re-transfer the other 40% participating interest in the licenses back to the Company's subsidiary, LNG Energy (PNG) Limited ("LNG PNG"). Therefore as at June 30, 2016, the Company has a 60% working interest in PRL 13.

These licenses are subject to a 22.5% back-in participation right in favour of the government. The government may exercise this right at any point in time in exchange for 22.5% of the costs incurred in the development of the property until that point in time. The government also has a 2% royalty over any oil and natural gas production that may occur with respect to these licenses.

If the Company does not meet the expenditure or work program requirements outlined above, it may result in the loss of the licenses if variation applications are not approved by the DPE.

(b) Bulgaria

In September 2011, the Company entered into a farm-in transaction with a wholly owned subsidiary of TransAtlantic Petroleum Ltd. ("TransAtlantic"), to earn a 50% interest in a future production concession (the "Etropole concession") in Bulgaria. The application for the Etropole concession was submitted in November 2011, amended in April 2012 and denied in July 2014. The denial was partially due to the enactment of legislation banning fracture stimulation by the Bulgarian Parliament in January 2012. In August 2014, TransAtlantic and the Company filed a formal appeal to the denial of the Etropole concession. The appeal was heard by the relevant court on November 23, 2015. On February 23, 2016, the court issued a ruling supporting the Company's position and remanded the case back to the Ministry of Energy for reconsideration using specific guidelines. The Ministry of Energy has the right of appeal. As of the date of these financial statements, the Company has not received a notice that a formal appeal has been filed.

In exchange for the Company's 50% undivided interest in the Etropole concession, the Company is expected to fund up to US\$20 million of drilling, completion costs and additional aggregate acreage payments, of which US\$7,492,122 (Cdn\$7,570,435) has already been funded. These costs remain fully impaired as at June 30, 2016, as the ban on fracture stimulation created uncertainty with respect to the ultimate cost recovery of the Company's assets in Bulgaria.

4. Exploration and evaluation assets (continued)

(c) Poland

The Poland exploration and evaluation asset balance consisted of capitalized costs incurred by the Company related to its interest in concessions in Poland that are held through its interest in an associate and two joint ventures (Note 6). The Company's interest in these joint ventures are accounted for using the equity method.

On March 31, 2015, the Company entered into a binding agreement to withdraw from the Company's investment in Saponis Investments Sp z.o.o. (Note 6).

As at June 30, 2016, the Company was in the process of exiting from all investments in Poland, which resulted in the Poland exploration and evaluation assets remaining impaired in full.

(d) United States

(i) Sheridan County

In March 2015, the Company relinquished all of its oil and gas leases in Sheridan County and plugged and abandoned the Archer well (see Note 7). The costs associated with the oil and gas leases were impaired on December 31, 2014, and the net book value of both the oil and gas leases and the Archer well remained at \$Nil as at June 30, 2016.

(ii) Cascade County

On December 2014, the Company relinquished all of its oil and gas leases in Cascade County recognizing a full impairment of the costs associated with them.

6. Associate and joint ventures

(a) Saponis Investments Sp z.o.o.

On March 31, 2015, the Company entered into a binding agreement to withdraw (the "Withdrawal Agreement") from the Company's investment in Saponis. In accordance with the Withdrawal Agreement, the Company transferred its 42.96% interest in Saponis to BNK, paid the final cash call of US\$100,000, and assigned and forgave its loans receivable from Saponis in exchange for BNK assuming the future obligations of Saponis. As at June 30, 2016, the Company's investment in Saponis was \$Nil.

(b) Joyce Podlasie LLC ("Joyce")

As at June 30, 2016, the Company, through its subsidiary, Kaynes, holds a 50% interest in Joyce. The remaining 50% interest in Joyce is owned by San Leon Energy Plc ("San Leon"). As of February 28, 2015, the Company along with its joint venture partner San Leon informed the Ministry of Geology that the Ilawa concession was being relinquished. As at June 30, 2016, the Company was in the process of exiting from all investments in Poland, including Joyce, which resulted in the Company's investment in Joyce remaining impaired in full.

(c) Maryani Podlasie, LLC ("Maryani")

As at June 30, 2016, the Company, through its subsidiary, Kaynes, holds a 50% interest in Maryani. The remaining 50% interest in Maryani is owned by San Leon. The Wegrow concession that was previously held by Maryani expired in June 2014, which resulted in a full impairment of the Company's investment in Maryani during the year ended September 30, 2014. As at June 30, 2016, the Company was in the process of exiting from all investments in Poland, including Maryani, which resulted in the investment in Maryani remaining impaired in full.

(d) EERL Holdings (BVI) Ltd.

As at June 30, 2016, the Company holds a 50% interest in EERL Holdings (BVI) Ltd ("EERL Holdings"). The remaining 50% ownership in EERL Holdings is owned by a third party. EERL Holdings owns 31.5% of Telemu. As at June 30, 2016, the investment in EERL Holdings is \$190,737 (September 30, 2015 – \$124,857).

7. Decommissioning obligations

Changes to the decommissioning obligation for the Archer Well in Montana, USA, are as follows:

	June 30, 2016	September 30, 2015
Balance, beginning of the period	\$ -	\$ 55,876
Accretion expense	-	581
Settlement of decommissioning obligations	-	(50,362)
Foreign exchange	-	(6,095)
Total current decommissioning obligations	\$ -	\$ -

The undiscounted cash flow required to settle the obligation for the Archer Well in Montana, USA was approximately US\$50,000. The calculation was assessed using a risk-free interest rate of 2.55% and an assumed inflation rate of 2.0% per annum. On March 2015, the Archer Well was plugged and abandoned, which resulted in a decommissioning obligation of \$Nil as at June 30, 2016.

8. Loans payable

(a) Credit facilities

In February 2012, the Company's wholly owned subsidiary, Kaynes, entered into two non-revolving credit facilities totaling US\$5,000,000 ("the Credit Facilities"). On April 28, 2014, the Company settled US\$2,636,363 of the Credit Facilities through the issuance of an aggregate of 10,943,396 common shares of Esrey at a deemed price of Cdn \$0.265 per common share.

The Credit Facilities matured in February 2015. On March 31, 2015, the Company entered into a Debt Settlement Agreement to settle in full the matured non-revolving credit facilities owed by Kaynes. At maturity, Kaynes owed US\$3,377,776 under the Credit Facilities. In exchange for the settlement of the amount due, the Company, through its wholly owned subsidiaries:

- Repaid US\$1,600,000;
- Agreed to fund the lender's share of certain work programs in Papua New Guinea that the parties are involved in; and
- Agreed that for a period of 72 months after the date of closing to acquire any new oil and gas licenses in Papua New Guinea through the Company's subsidiary, Telemu No. 18 Limited, in which the lender has a 15.75% indirect interest.

For the three and nine months ended June 30, 2016, the interest expense related to the Credit Facilities was \$Nil. (Three and nine months ended June 30, 2015 - \$1,524 and \$135,708 respectively) and was payable upon maturity. Interest was accrued at a fixed rate of 7% per annum, compounded semi-annually.

(b) Loan

As at June 30, 2016, the Company has a loan payable due to EERL Holdings of \$392,023 (September 30, 2015 - \$236,713). The loan is non-interest bearing and has no fixed date of repayment.

9. Share capital

(a) Authorized

- Unlimited number of common shares with no par value.

(b) Stock consolidation and split

On November 18, 2013, pursuant to a special resolution passed by shareholders on November 6, 2013, the Company consolidated its common shares on a 1,000 old for 1 new basis (the "Consolidation"). Shareholders holding less than one full share post-Consolidation were entitled to a cash payment of \$0.01 per share on a pre-Consolidation basis in lieu of a fractional share. Following the Consolidation, the Company immediately completed a stock split on the basis of 1 old for 50 new, with fractional shares being rounded to the nearest whole number (the "Stock Split"). The Consolidation and Stock Split achieved a 20 to 1 consolidation (the "Effective Consolidation"). Prior to Effective Consolidation, the Company had 577,353,410 common shares issued and outstanding. Subsequent to the Effective Consolidation, the Company had 28,819,375 common shares issued and outstanding.

All comparative references to the number of shares, options, weighted average number of common shares and loss per share have been restated for the Effective Consolidation.

18. Capital management

The Company manages, as capital, the components of shareholders' equity. The Company's objectives when managing capital are to (i) safeguard its ability to continue as a going concern in order to explore its oil and gas interests, and (ii) to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new equity if available on favorable terms, option its oil and gas properties for cash and/or expenditure commitments, enter into joint venture arrangements, or borrow, acquire or dispose of assets.

18. Capital management (continued)

The Company's policy is to invest its cash in highly liquid, interest-bearing, fully guaranteed bank-sponsored instruments with maturities of a year or less from the date of acquisition. The Company is not subject to externally imposed capital requirements.

19. Financial instruments

The Company's financial instruments consist of cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities and loans payable.

(a) Fair value of financial instruments

(i) Fair value estimation of financial instruments

Financial instruments that are measured subsequent to initial recognition at fair value are grouped into a hierarchy based on the degree to which the fair value is observable. Level 1 fair value measurements are derived from unadjusted, quoted prices in active markets for identical assets or liabilities. Level 2 fair value measurements are derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability directly or indirectly. Level 3 fair value measurements are derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data.

The carrying amount for cash and cash equivalents, amounts receivable and accounts payable and accrued liabilities on the statement of financial position approximate their fair value due to the short-term to maturities of these financial instruments.

The carrying amount for loans payable approximates its fair value due to the short-term to maturity of this financial instrument.

(b) Financial risk management

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity and funding risk, and market risk. There have been no substantive changes in the Company's exposure to financial instrument risk, the Company's objectives, policies and processes for managing those risks or the methods used to measure them from previous years.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The overall objective of the Board is to set policies that seek to reduce the Company's risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

(i) Credit risk

Credit risk is the risk of an unexpected loss if a third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk arises principally from the Company's cash and cash equivalents and amounts receivable. Cash consists of cash on deposit in major banks that are considered to be creditworthy. Amounts receivable are comprised primarily of amounts due from GST receivables from the government in Canada. The carrying values of the financial assets represent the maximum credit exposure.

(b) Financial risk management (continued)

(ii) Liquidity and funding risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash and cash equivalents. The Company's cash is invested in business accounts and are available on demand.

Funding risk is the risk that the Company may not be able to raise equity financing in a timely manner and on terms acceptable to management. There is no assurance that such financing will be available when, and if, the Company requires additional equity financing (Note 2c).

In the normal course of business, the Company enters into contracts and performs business activities that give rise to commitments for future minimum payments. The following table summarizes the Company's significant remaining contractual maturities for financial liabilities at June 30, 2016 and September 30, 2015.

June 30, 2016				
	Less than 3 months	3 - 12 months	1 - 5 years	Total

19. Financial instruments (continued)

(c) *Financial risk management (continued)*

(iii) *Market risk*

The Company is subject to normal market risks including fluctuations in foreign exchange rates and interest rates. While the Company manages its operations in order to minimize exposure to these risks, the Company has not entered into any derivatives or contracts to hedge or otherwise mitigate this exposure.

(a) *Interest rate risk*

Interest rate risk is the risk arising from the effect of changes in prevailing interest rates on the Company's financial instruments. The Company has minimal exposure to interest rate fluctuations on its cash and cash equivalent balances due to current low market interest rates.

(b) *Foreign currency risk*

Some of the Company's exploration expenditures, certain acquisition costs and other operating expenses are denominated in the US dollar, Papua New Guinea kina, Polish zloty and European Euro. The Company's exposure to foreign currency risk arises primarily on fluctuations between the Canadian dollar and the US dollar, Papua New Guinea kina, Polish zloty and European Euro. The Company has not entered into any derivative instruments to manage foreign exchange fluctuations.

20. Subsequent Events

On July 18, 2016, 47,500 options outstanding and exercisable at \$2.40/share expired.
